

Discord 101

Monday, May 18, 2020
21:39

	Mute - Mutes your microphone.
	Deafen - Will stop you from hearing everyone talking in a channel. Think of this like taking off your headset.
	Green speaker means you're live in a voice channel
	Voice Connected - Click the Phone with the X to leave a voice channel. NOTE: Many people leave their mic on and broadcasting in a channel by accident. DO NOT hot mic.
	Volume - for individual users & mute - Right-click a user.
	Category - Similar to a folder that has many channels inside
	text-channel - They are all lower case and do not accept special characters and spaces are replaced with a -
	
	Voice channel -Voice / Video / Screen sharing in here.
	afk - Away From Keyboard is a voice channel that most servers have setup. If you are away for X time, you will be moved here automatically.
Label Roles:	There are two main roles:

	<p>Label Role - Has no permissions, but will tag a user so you know which type of user they are. (e.g. goon)</p> <p>Permission Role - Has specific permissions that will give the person the ability to do something on the server</p> <p>Bots and channels can do things based on ANY type of role.</p>
<p>Permission Roles:</p> 	
	<p>NITRO - What is the diamond to the right of some users? This is a special icon users get when they boost the server with NITRO.</p>
	<p>Reactions - You can react to a message. This is used quite a bit to interact with bots.</p>
	<p>Roles Channel - There is a role menu created by bot that allows you to react to gain a role.</p> <p>In this case there is only 1 role "announcements" which will give that role if the user "reacts" to it by clicking on the megaphone icon.</p>
	<p>New Messages in Channel - Channels with new content will turn "white" and have a little dot to the left of it.</p>
	<p>New Messages - How to find "New" messages. The "NEW UNREADS" will pop up.</p>
	<p>Jump To Present - Allows you to go to the current messages with a click of a button vs. scrolling all the way down.</p>
	<p>Pinned Messages - Important messages can be "Pinned" to the top of a channel. You can click the pin to see what messages are pinned.</p>
	<p>Pin Message - Right click a message to pin it.</p>
	<p>Settings - Click here to configure your settings</p>

<div data-bbox="115 98 623 294"> <div>Appearance</div> <div> <div>Game Activity</div> <div>Text & Images</div> <div>Appearance</div> <div>Streamer Mode</div> </div> <div> <div>ADVANCED</div> <div>Developer Mode</div> <div>Developer Mode exposes context menu items helpful for people writing bots using the Discord API.</div> </div> </div> <div data-bbox="115 294 332 294">Copy ID</div>	<p>Developer mode:</p> <p>Every user, category and channel on Discord has a UNIQUE ID associated with it.</p> <p>Every user has a "tag". For example here is my information: Tag: Riverside#8712 ID is: 653264873052176424</p> <p>I can change my tag to any name I choose, however, my ID is not changeable. If someone is behaving poorly (e.g. trying to impersonate someone), you want to get their ID so that we can ensure the account is dealt with appropriately.</p> <p>You can send messages or refer to users in different ways:</p> <p>Tag: @Riverside ID: <@653264873052176424></p> <p>Sandwiching the ID in <@id> is what is typically used with bots.</p>
<div data-bbox="115 495 365 548">Privacy & Safety</div>	<p>Privacy & Safety settings are adjusted in this section</p>

<div data-bbox="115 1902 222 1955"> </div>	<p>How to start a voice or video call - Click on the respective icon to start.</p>
<div data-bbox="115 1955 396 1995"> </div>	<p>How to hide channels you don't want to see.</p>

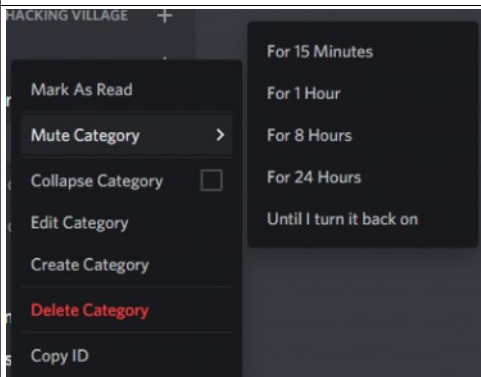

Click the down arrow on the server then click "Hide Muted Channels"

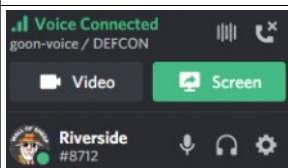

Mute a channel

Right click the channel then click the amount of time you wish to stop seeing notifications

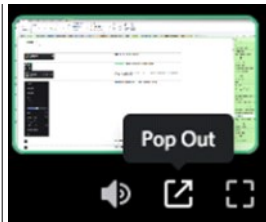

Mute a category

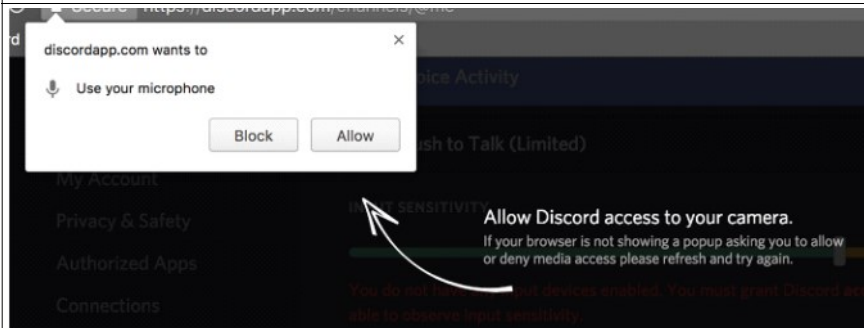

Right click the category then click the amount of time you wish to stop seeing notifications

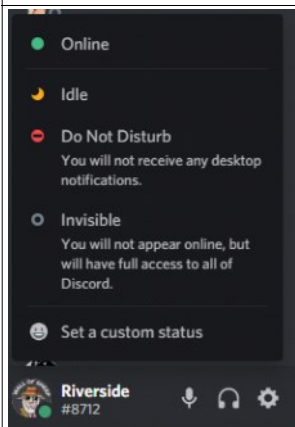

Screen Share - As a video call is in progress, you may click the "Screen" button to start sharing your screen.

Video Pop Out - Allows you to pop out the video window from the Discord application. This allows you to have the video full screen on a second monitor while chatting in the app on another.

Mic not working? Allow Discord to use it.

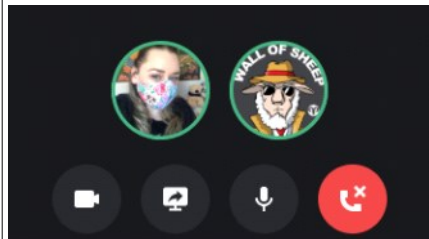

Changing Online Status - Left click your avatar then click the mode you wish to be in.

Online - Business as usual. You'll appear online with a green circle beside your avatar.

Idle - Normally, you'll automatically switch to idle if you're AFK for a certain amount of time, but you can manually select it in the pop-up menu. Unlike the auto-idle status, manually setting idle will allow you to stay that way indefinitely.

DND - Setting yourself to Do Not Disturb (DnD) will show your avatar with a red circle and automatically mute any and all desktop notifications you'd normally receive.

Invisible - Setting yourself as Invisible will make you appear offline entirely, but you'll still be able to access all of Discord as normal. This includes messaging your friends without appearing online.

Options when having a conversation:

Start video

Share Screen

Mute

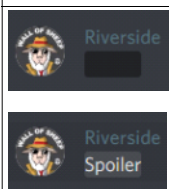

End Call

Italics ***italics* or _italics_** Underline italics __*underline italics*__
Bold ****bold**** Underline bold __**underline bold**__
Bold Italics *****bold italics***** **underline bold italics** *****underline bold italics*****__
Underline __underline__ Strikethrough ~~Strikethrough~~
 Spoiler ||Spoiler||

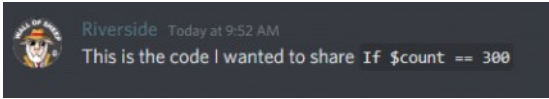

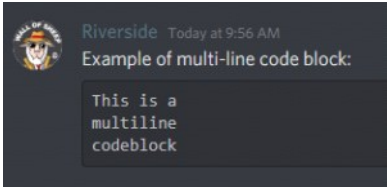

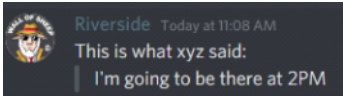

How to use Markdown Text

Spoilers - You may black out text and/or Images using "Spoilers". The user has to intentionally click to see what you placed there.

This is done by wrapping the text you want to be a spoiler in the markdown tag ||

||Spoiler||

<p>This is the code I wanted to share <code>`If \$count == 300`</code></p> 	<p>Code Blocks (Single-line) - You may mark text as a code block by wrapping your text in backticks (`)</p>
<p>Example of multi-line code block:</p> <pre>''' This is a multiline codeblock '''</pre> 	<p>Code Blocks (Multi-line) - You can use three backticks (```) to create multiline code blocks</p>
<p>This is what xyz said:</p> <pre>> I'm going to be there at 2PM</pre> 	<p>block quote - The syntax to use Block Quotes is > or >>> followed by a space.</p> <p>This is used typically used when trying to quote someone else.</p>
